

- **Murphy's Laws**

- If anything can go wrong, it will
Corollary: It can
Corollary sent by **Dr. Allen Roberds**
MacGillicuddy's Corollary: At the most inopportune time
Corollary sent by **Earl R. Johnson**
- If there is a possibility of several things going wrong, the one that will cause the most damage will be the one to go wrong
- If anything just cannot go wrong, it will anyway
- If you perceive that there are four possible ways in which something can go wrong, and circumvent these, then a fifth way, unprepared for, will promptly develop
Corollary: It will be impossible to fix the fifth fault, without breaking the fix on one or more of the others
Corollary sent by **Sean Cheshire**
- Left to themselves, things tend to go from bad to worse
- If everything seems to be going well, you have obviously overlooked something
- Nature always sides with the hidden flaw
Corollary: The hidden flaw never stays hidden for long.
Corollary sent by **Dave M.**
- Mother nature is a bitch.
- **Murphy's Law of Thermodynamics**
Things get worse under pressure.
- **The Murphy Philosophy**
Smile . . . tomorrow will be worse.
- **Quantization Revision of Murphy's Laws**
Everything goes wrong all at once.
- **Murphy's Constant**
Matter will be damaged in direct proportion to its value
- **Murphy's Law of Research**
Enough research will tend to support whatever theory.
- Research supports a specific theory depending on the amount of funds dedicated to it.
Sent by **Tony '68**
- **Addition to Murphy's Laws**
In nature, nothing is ever right. Therefore, if everything is going right ... something is wrong.
- **More Laws**
- Anything that can go wrong will go wrong.
- It is impossible to make anything foolproof because fools are so ingenious.
- Left to themselves, things tend to go from bad to worse.
- Rule of Accuracy: When working toward the solution of a problem, it always helps if you know the answer.

Corollary: Provided, of course, that you know there is a problem.

- Nothing is as easy as it looks.
- Everything takes longer than you think.
- Everything takes longer than it takes.

Sent by [Jon Carpenter](#)

- If anything simply cannot go wrong, it will anyway.
- Whenever you set out to do something, something else must be done first.
- Every solution breeds new problems.
- The legibility of a copy is inversely proportional to its importance.
- no matter how perfect things are made to appear, Murphy's law will take effect and screw it up.

Sent by [Mitch](#)

- You cannot successfully determine beforehand which side of the bread to butter.
- The chance of the buttered side of the bread falling face down is directly proportional to the cost of the carpet.

Sent by [Paul Breen](#)

- The chance of the bread falling with the buttered side down is directly proportional to the cost of the carpet.
- **More Laws of Selective Gravitation.**
- A falling object will always land where it can do the most damage.
- A shatterproof object will always fall on the only surface hard enough to crack or break it.
- A paint drip will always find the hole in the newspaper and land on the carpet underneath (and will not be discovered until it has dried).
- A dropped power tool will always land on the concrete instead of the soft ground (if outdoors) or the carpet (if indoors) - unless it is running, in which case it will fall on something it can damage (like your foot).
- If a dish is dropped while removing it from the cupboard, it will hit the sink, breaking the dish and chipping or denting the sink in the process.
- A valuable dropped item will always fall into an inaccessible place (a diamond ring down the drain, for example) - or into the garbage disposal while it is running.
- If you use a pole saw to saw a limb while standing on an aluminum ladder borrowed from your neighbor, the limb will fall in such a way as to bend the ladder before it knocks you to the ground.
- If you pick up a chunk of broken concrete and try to pitch it into an adjacent lot, it will hit a tree limb and come down right on the driver's side of your car windshield.
- **More Laws of Selective Gravitation** were sent by Jack from the [Classic CKLW Page](#)

- The greater the value of the rug, the greater the probability that the cat will throw up on it.
Sent by **Ralph**
- You will always find something in the last place you look.
- If your looking for more than one thing, you'll find the most important one last.
Sent by **Alegna**
- It is never in the last place you look. It is in the first place you look, but never discovered on the first attempt.
Sent by **Peter**
- After you bought a replacement for something you've lost and searched for everywhere, you'll find the original.
Sent by **Dizzy**
- You have to look where you lost it.
Sent by **ClaytonPrc@aol.com**
- No matter how long or how hard you shop for an item, after you've bought it, it will be on sale somewhere cheaper.
- The other line always moves faster.
- In order to get a loan, you must first prove you don't need it.
- Anything you try to fix will take longer and cost you more than you thought.
- If you fool around with a thing for very long you will screw it up.
- If it jams - force it. If it breaks, it needed replacing anyway.
- When a broken appliance is demonstrated for the repairman, it will work perfectly.
- Build a system that even a fool can use, and only a fool will use it.
- Everyone has a scheme for getting rich that will not work.
- In any hierarchy, each individual rises to his own level of incompetence, and then remains there.
- There's never time to do it right, but there's always time to do it over.
- When in doubt, mumble. When in trouble, delegate.
- Anything good in life is either illegal, immoral or fattening.
- Murphy's golden rule: whoever has the gold makes the rules.
- A Smith & Wesson beats four aces.
- In case of doubt, make it sound convincing.
- Never argue with a fool, people might not know the difference.
- Whatever hits the fan will not be evenly distributed.
- No good deed goes unpunished.
Sent by **John Cougar** and by **getalife** who asks "who wrote that?".
Illustrious Blackbird knew the answer, it was Samuel L. Clemens also known as **Mark Twain**.
- Where patience fails, force prevails.
Sent by **Woody**.

- Uffelman's Razor:
[Given Murphy's law, ...] One should not attribute to evil design any unfortunate result which can be attributed to error. A mistake (or

series of mistakes) is the simpler and more likely explanation.

Conspiracy Corollary to Uffelman's Razor:

Nothing should be attributed to conspiracy that can be explained by error or a succession of errors.

- ♦ Example 1: The alleged conspiracy to "fake" the Apollo moon landing.

Such an undertaking would be so likely to result in multiple glitches that it would be nearly impossible to pull off. Thus, conspiracy is an unlikely explanation of events. Accordingly, the "evidence" of the "faked" landing is more likely a result of the errors of those interpreting the evidence than of the evil design of the alleged conspirators.

- ♦ Example 2: The Warren Report.

Any open questions in the Warren Report are more likely the result of the errors of the Warren commission, or the errors of those interpreting the Warren Report, than the result of a conspiracy to cover up the true facts.

- copyright 1995, 2002. [David G. Uffelman](#)

- Probability law:

Probabilities serve only and exclusively to determine the degree of improbability of the catastrophes that actually take place.

Corollary: If something is likely to happen AND desirable, it won't happen.

The likelihood of something happening is in inverse proportion to the desirability of it happening.
Sent by [Ken Kaplan](#)
- Uffelman's Razor:
[Given Murphy's law, ...] One should not attribute to evil design any unfortunate result which can be attributed to error. A mistake (or series of mistakes) is the simpler and more likely explanation.
Conspiracy Corollary to Uffelman's Razor:
Nothing should be attributed to conspiracy that can be explained by

error or a succession of errors.

- Example 1: The alleged conspiracy to "fake" the Apollo moon landing.

Such an undertaking would be so likely to result in multiple glitches that it would be nearly impossible to pull off. Thus, conspiracy is an unlikely explanation of events. Accordingly, the "evidence" of the "faked" landing is more likely a result of the errors of those interpreting the evidence than of the evil design of the alleged conspirators.

- Example 2: The Warren Report.

Any open questions in the Warren Report are more likely the result of the errors of the Warren commission, or the errors of those interpreting the Warren Report, than the result of a conspiracy to cover up the true facts.

- copyright 1995, 2002. [David G. Uffelman](#)

- Probability law:

Probabilities serve only and exclusively to determine the degree of improbability of the catastrophes that actually take place.

Corollary: If something is likely to happen AND desirable, it won't happen.
